

GMA1193 Smart Scan Module

GMA1193 features advanced motion tolerance, supporting barcode reading at speeds exceeding 2 m/s, enabling efficient "read-on-the-fly" performance. Its wide-angle lens increases the scanning field of view, allowing for automatic object detection from multiple angles and instant scan triggering. This significantly reduces transaction times and enhances the user experience in retail self-checkout scenarios. Equipped with proprietary decoding algorithms, the GMA1193 delivers high-speed scanning of both 1D and 2D barcodes. It demonstrates superior performance in reading barcodes on folded, reflective, or curved surfaces, ensuring reliable operation in various retail environments.

FEATURES

• Wide-Angle Lens Design

The wide-angle lens expands the scanning field of view, detecting automatically approaching objects from various angles and trigger the scanning process instantly.

• Exceptional Motion Tolerance

GMA1193 features outstanding motion tolerance, enabling accurate and reliable barcode decoding at object speeds of over 2 meters per second.

• Adapts to Diverse Application Scenarios

It is fully compatible with mainstream Windows, Android, and Linux systems, and is suitable for various application scenarios such as retail checkout, self-service machines, ticket verification, or mobile payment.
